

PYROLON® CBFR

Advanced Chemical Barrier and Flame Resistance for the Highest Chemical Hold-Out

Pyrolon® CBFR Applications

Ammonia

Hydrofluoric Acid

Petrochemical

Heat Sealed Seam

Pyrolon CBFR - Advanced chemical protection and self-extinguishing FR protection. Designed to be worn over primary FR protective clothing, for environments where both chemical exposures and flash fire are a concern. This advanced chemical barrier is self-extinguishing, won't melt or drip, and meets the NFPA 2113 requirements for section 5.1.9.

Pyrolon CBFR is your choice for protection in harsh chemical environments for the likes of Ammonia, Hydrofluoric Acid and other serious chemicals where workers need chemical protection over primary FR protective garments.
