

The "study day" allows distributor and end user delegates to contribute to a dynamic and energetic study of the factors affecting chemical suit selection. It provides a companion to "The Guide to Chemical Suit Selection" and a valuable tool in understanding how to choose the right suit for the job.

El "Día del Estudio" permite al distribuidor y a los delegados del usuario final contribuir a un estudio dinámico y energético de los factores que afectan a la selección de trajes de protección química. Es un complemento a "La guía para la selección de trajes de protección química" y una valiosa herramienta para comprender cómo elegir la ropa adecuada para el trabajo.

Nel corso della giornata di studio, i rappresentanti di distributori e utenti finali avranno la possibilità di essere coinvolti in una valutazione dei fattori più importanti per la scelta di una tuta chimica. Si tratta di un valido complemento alla Guida per la scelta di una tuta chimica e rappresenta un'esperienza utile per imparare a scegliere la tuta più adatta per ogni occasione.

"Dzień studyjny" pozwala przedstawicielom dystrybutorów i użytkowników końcowych wziąć udział w dynamicznym i energicznym badaniu czynników wpływających na wybór kombinezonów chemicznych. Program stanowi uzupełnienie „Przewodnika wyboru kombinezonów chemicznych” i cenne narzędzie pomagające w zrozumieniu, jak wybrać właściwy kombinezon do danej pracy.

"It was not a traditional training session. It was much more than that and of course not to forget - it was fun!"
Filip Jambon Product Manager, Vandeputte

Which garment should I choose?

1.
The
Chemical?

2.
Hazard/
spray
type?

3.
Physical/
Environmental
factors?

The Chemical Suit Selection Study Day enables end user and distributor professionals - in conjunction with our Lakeland Experts - to develop ideas on selecting the best suit for the job, covering the chemical, hazard/spray type and physical/environmental factors.

The day includes dynamic break-out sessions involving the development of group ideas with the objective of developing strategies for selecting chemical protective clothing. The standard event is a full day, but can be tailored to suit your requirements - in every case, whether end user or distributor, you will find it instructive, fun and most importantly, useful!

El Día del Estudio dedicado a la selección de trajes de protección química permite al usuario final y a los profesionales de la distribución, junto con nuestros expertos de Lakeland, desarrollar ideas para seleccionar la ropa más adecuada para trabajar... abarcando Productos químicos, Tipo de peligro/Pulverización y Factores físicos y medioambientales.

El día incluye dinámicas sesiones desglosadas que incluyen el desarrollo de ideas grupales con el objetivo de desarrollar estrategias para seleccionar ropa de protección química.

Nell'arco della giornata di studio per la scelta della tuta chimica, distributori e utenti finali del settore avranno modo di collaborare con gli esperti Lakeland per individuare le migliori strategie per la scelta di una tuta chimica, tenendo in considerazione diversi fattori: agente chimico, livello di rischio/tipologia di spruzzo, fattori fisici e ambientali.

I partecipanti verranno divisi in gruppi di studio separati con l'obiettivo di sviluppare idee e strategie per la scelta degli indumenti di protezione chimica.

Podczas Chemical Suit Selection Study Day użytkownicy końcowi i dystrybutorzy mogą - wspólnie z ekspertami Lakeland - opracowywać pomysły dotyczące wyboru najlepszego kombinezonu do danej pracy... uwzględniając używane substancje chemiczne, rodzaj zagrożenia/sposób rozpylania oraz czynniki fizyczne i środowiskowe.

Uczestnicy biorą udział w dynamicznych sesjach w mniejszych grupach, które obejmują wypracowywanie wspólnych pomysłów w celu stworzenia strategii wyboru odzieży chroniącej przed chemikaliami.

Images from Study Day, Antwerp, July 2016

“It was not a traditional training session. It was much more than that. Working in mixed groups (product specialists / account managers / end users) gave us different angles to come up with our own creative solutions. This encouraged all participants to actively give input about their specific working conditions and selection methods. It was very instructive and effective in developing a better understanding of this, sometimes complicated topic! And of course not to forget - it was fun!”

Filip Jambon Product Manager, Vandeputte

“First of all thank you for the very good information session yesterday, I would certainly recommend it to other PPE-specialists to learn more about chemical protective suits”

Stephanie D'Hondt Occupational Safety, BASF

“It was an exciting and inspiring day. The approach was animated and above all a very good way to stimulate experience exchange with other users. Personally it was a better day than common networking moments during other training sessions and seminars”

Dennis Nijsmans Preventieadviseur, Engie Electrabel
