

Your Wildland gear doesn't have to be antiquated. Step up your comfort with ergonomic, athletic gear that is designed to move with you.

### LAZERMAX™ REFLECTIVE PIPING.

Lakeland's patented silver reflective piping helps wildland firefighters stay visible in the toughest conditions with reflective seams on the sleeves, shoulders, back, and on the outside leg seams.

### VERTICAL BACK PLEATS.

Vertical back pleats make improved flexibility and maneuverability a reality. Lakeland's Wildland gear can help improve mobility and performance when seconds matter.

### 3M™ SCOTCHLITE™ REFLECTIVE MATERIAL.

Stand out and improve nighttime visibility with 3M™ Scotchlite™ Reflective Material on the upper back, sleeves, and pant leg.

### DYNAMIC KNEE CONSTRUCTION.

The best-designed knee on the market, Lakeland's Wildland pant offers a triple knee pleat, improving flexibility and movement.

# LAKELAND WILDLAND GEAR

## Performance Driven Design

### TWO-PIECE CURVED SET-IN SLEEVES.

A two-piece curved set-in sleeve means improved movement with less restriction. Stay focused on the job and let your gear move with you.

### ERGONOMIC, ATHLETIC FIT.

Wildland firefighters demand ergonomic, athletic gear that maximizes functionality and performance. That's why all of Lakeland's firefighter gear includes the same ergonomic cut and athletic fit.

### LARGE CARGO AND FUNCTIONAL POCKETS.

Carry essential equipment or warm your hands with Lakeland's large front pocket. A radio pocket, pleated pocket, and chest pockets give you all of the storage you need in the jacket, with additional expansion and rear pleated pockets on the pant.

### Are you ready to #GearUp?

Take the next step and contact Lakeland to request a consultation or product demonstration of Lakeland's Wildland gear.
